Roller Ball Pocket piece

Folded in half

C

A

Wallet

Main Piece

out of main fabric  
and

Cut 2 out of light weight Interfacing

Cut 2

- 2x A piece
- 1x B piece
- 1 x C piece (Pocket)
- 1" Hook and Loop Tape

use pattern to cut out interfacing for piece A & B

Take pocket piece and fold in half length ways, Press, Top stitch along the folded edge

Take B piece, fold in half, sew along one short side and down long side  
Flip right sides out and press, top stitch along 3 sides

Using a Water soluble pen or Chalk marker find centre of piece A  
place centre of piece C (pocket piece) folded end up, lay the pocket piece  
on the bottom of piece A, line up the bottom of each piece, Sew down the  
middle of the pocket securing it to piece A, back stitch at the top of the pocket  
to ensure security as there will be lots of pressure from bottles going in and out  
over time.

Take each side of the pocket piece and line it up with  
the edge of piece A, Sew close to the edge and  
secure the pocket down to create 2 pockets.

This row of stitches is just to keep things in place and  
wont be visible once its finished so make sure its  
close to the edge.

from the middle seam measure  $\frac{3}{4}$ " away on either side, mark with a pen, draw a straight line from the folded edge to the raw edge, the pocket will now be the perfect size for a 10ml bottle, test out the pockets after you sew this seam to make sure its good

Now we will do another seam that is purely to keep things in place, take the pockets and fold over as shown, (like your pleating) Sew as close to the edge as possible

These stitches wont be visible on the finished product

Take the second Piece A and sew on the Loop portion of your Velcro.

measure about 1 1/2" in from the short side and centre it

sew around the tape and down the middle for extra security

This velcro will be behind your bottle pockets

Now you can assemble, place the two A pieces right sides together, make sure the Velcro is ontop of the bottle pockets

Centre Piece B on the other side

Sew all the way around except for a 1 or 2" gap for turning

Now turn right side out and press, turn in the edges of the hole

Once pressed do a top stitch around it securing the hole shut

Place bottles into wallet and close it up to test where you will place the Velcro, Sew on the Velcro and you should be done!
