How to create the centre circle

Measure a circle the size you wish to use to cover the centre of your Dresden plate

Now draw a larger circle 1/2" wider

Use the larger circle to use as a template to cut your fabric

use a needle and thread and do a running stitch around the perimetre of the circle. pull the thread to gather the edge

place the smaller paper circle into the centre of the fabric

press the edges of the fabric.

remove the paper template and place the perfect circle on your dresden plate and top stitch into place
